Mavericks

Among livestock men the name Maverick is applied to unbranded animals—those without any known owner.

Through the years the word has taken on a broader meaning and is now given to almost any non-conformist—man, plant or animal.

Human Mavericks are much too independent to always agree among themselves, but all of them have one point in common—they are interesting. We like 'em because they are not afraid of having new thoughts and trying new things.

Every plant breeder from the time of the first man down to the present has been looking for these Mavericks, taming and branding them and passing his discoveries on to other folks for their enjoyment. We have a few to our credit and you will find them among the glads, violas, and pyrethrums described in this catalog. Look them up, plant them and we believe you will find them good—at least other folks like 'em.

Now that the driving force of younger years is waning we find we have a growing and greater appreciation of those who take time to write us friendly letters. Many of you wrote kind things about the introduction of our Silver Anniversary catalog last spring. Don't know why so many garden fans are fine folks unless it be true that "one touch of Nature makes the whole world kin." We thank you.

FLOYD C. KAYLOR
MERTIE L. KAYLOR

Add 25c postage if your order is for less than \$1.25.

Mixed Glads

Large bulbs, many kinds and colors—all good sorts: 25—\$1.25; 100—\$3.50. Medium size, 50—\$1.75.

Mixed Dahlias

Large flowered, miniature and pom-poms—all listed in this catalog, 5—\$2.00; 10—\$3.50.

Plant Manna

It is a combination of plant foods, mineralized, harmonized and vitaminized. Use it as a high-power fertilizer or as a shock-proof material in transplanting. Can be used in the soil or as a spray. Try it on tomatoes to hurry along ripening. Economy size package contains 100 pellets, which, dissolved in water, will make up to 150 gallons of liquid fertilizer at a cost of only \$1.00.

Double Pyrethrums

Painted Daisies

During recent years there has grown up an increasing interest among gardeners in this beautiful and most useful flower. Coming into bloom in late May and early June they supply a wealth of cut flowers for Decoration Day. Properly handled—deep containers and plenty of fresh water—they last a long time as house decorations. After first crop has been removed the plants continue to supply fresh flowers until cut down by frost. True, the later flowers are not up to the first crop, but they provide plenty of color while the finely cut evergreen foliage fills in any bare spots in the garden through the winter.

Most of the varieties we list are of our own originating. They are the result of a quarter of a century of plant breeding. Seedlings run from 250 to 1,000 singles to one good double and as we name and introduce doubles only, we have a lot of singles and semi-doubles. We call them Mavericks and they cover the color range from white to red.

Our named varieties have long stems, fully double flowers, and, with the exception of Cynthia, are strong growers. All are grown from divisions from the original mother plants and are therefore true. Descriptions are written in the field as we see the plant and flower.

Prices are for strong division plants with lots of roots so that they will "take hold" and produce flowers the first year, if set out early. Pyrethrums are early birds, so get the orders in as soon as possible. If orders arrive too late for early shipment, they will be held until July—one of the best times to move Pyrethrums.

Pyrethrums are among the most difficult plants to move. Over the years we have learned how to pack so that plants will stand up to six days in transportation. Orders for painted daisies are sent "special handling" parcel post and should arrive in good condition. If you live east of Chicago and want them sent air mail, we will pay half the postage. They require lots of packing material.

We have a large number of varieties not listed here—stocks are not yet large enough. Come to the nursery in early June and see them. We have fair to large stocks of the following varieties:

Purity. This is our pioneer, the first double to show up in our plantings. Some folks prefer its wide open, rounded white center to the ball like Snowball. 50c.

Pauline. The oldest of our reds, also the earliest to bloom. Main color a rich medium red with an orange overcast. 50c.

Phillip. Son of Pauline, even a stronger and a deeper red with some purple tones and center petals tipped white. 50c.

Caroline. The largest and best of the light to medium pinks. Very strong grower, finely cut center petals and it has the added attraction of usually producing fully double flowers until the end of the season. \$1.75.

Cynthia. Not so robust a grower as the others, but a dark red that leads some folks to call it the black red. Resents moving so plant and leave alone. Our customers place it first in reds. \$3.00.

Helen. From an eastern originator comes their excellent medium pink. In between Caroline and Paragon in color and a fine performer, \$1.50.

Paragon. Same large size as Caroline, even finer center petals and a deep pink color. Same habit of double flowers to late in the season. \$3.00.

Priscilla. After eight years of watching and propagating this new one we are offering it for sale this year for the first time. It is glistening white. A double row of perianth petals stand straight out and surround a dome of the finest cut center petals we have ever seen. Sometimes the stems come branched, each carrying a somewhat smaller flower than the one on center stem.

Two years ago we sent a plant of Priscilla to a commercial grower friend of ours at Niagara Falls, N. Y., for trial under eastern conditions. As soon as it bloomed last summer he sent us an air mail letter declaring his opinion was that it was the finest pyrethrum he had ever seen and that the introductory price should be \$25.00 per plant. We agree about Priscilla quality, but even with stock very limited, we still hold to our idea of good quality at a reasonable price and the price of this one is \$10.00.

Snowball. If any of those who have purchased this one during the last four years has any "squak" about it they have not told us. C. W. Wood, well known authority on perennials, writing in the Flower Grower, praised it highly as being an excellent cutter. It is properly named, a round ball of many petals and snow white color. 85c.

Mavericks. Singles and semi-doubles in shades of white, pink and red. Run of field but no two duplicates. If you like singles, these should please you. Just write "Maverick Pyrethrums," send us \$1.25 and we will send at least five plants.

Phyllis. Light and medium pink in a high-crowned large flower. A touch of cream at ends of petals. 50c.

Satisfactory Glads

Every commercial glad grower in the country spends time and money fighting disease. It therefore stands to reason there are no disease free stocks—let's be honest about the matter. Our 1951 crop comes closest to that wished-for state of any crop we have ever grown. Close inspection at order filling time, we hope, will further improve the quality and we can assure our customers of as good, or better, bulbs than any other grower in the country.

Several things are responsible for the excellence of last season's crop. Trenches treated with Carco-X prior to planting went a long way toward eliminating wire worms and other bugs. Soaking all planting stock in Natriphene before planting; using sub-irrigated bench land, plenty of cultivating and early harvest brought about the final result. Sprinkling glads, we have found, is a bad practice. Disease develops on wet leaves and spreads down to the bulbs. That's why we do not irrigate; also why we get them dug before the fall rains set in.

We carry both Carco-X and Natriphene for sale. Natriphene 50c.

For a long time we have wished for some way of cutting down the repetition of pricing in our glad list. Well, here is another Maverick we are going to try. We have grouped the glads into several price classes and hope we, as well as our customers, will find it a time saver. Each group contains varieties that should sell for a higher price, but we hope the time we save will make up for the lower price. Many prices have been cut down the middle of those of last year.

Sizes. Large (L) bulbs are from 1¼ to 2 inches in diameter. Mediums, ¾ to 1¼ inches. Smalls more than one-half inch. We have lots of smalls and the price is half that of large, but no single item less than 15c. 2—.15 means two large bulbs of one kind for 15c and not one bulb of two kinds. If you want bulblets include 25c and we will supply a generous quantity of the variety named.

Our experience shows medium sizes produce as good spikes as do jumbos, bulbs larger than 2½ inches. We have them at same price as large, only you should add one cent per bulb to pay extra postage.

Group 1

Group No. 1 Prices

Large: 2—15c; 10—60c; 25—\$1.35; 100—\$4.50. Medium: 3—15c; 10—45c; 100—

\$3.25. Small: 10—30c; 50—\$1.25; 100—\$2.25. Hundreds may be made up of 25 each for four varieties.

Abigail. Somewhat deeper lavender than the old Minuet and a much more reliable performer.

Burma. A giant in deep rose with ruffled edges.

Capsicum. Tall growing medium pink with cream throat peppered with small pink dots.

Corona. An old timer without which no glad collection is complete. Large light pink. Picotte edged deeper pink.

Elizabeth the Queen. Large flowered lavender with red throat. Some years tops, others very short.

Fabulous. Strong deep pink with a red feather in throat. It does exceptionally well under our conditions.

Gayly Glad. Florists call this the coral colored glad and it is always in demand. It is one of our own and despite its tendency to sometimes crook, thousands of blooms are used for decorative work. No other glad just its shade of coral pink. Plant deep to avoid crooking.

Greta Garbo. Large size light creamy pink still popular despite its having been on the market several years.

H. B. Pitt. This comes along a little late with its large medium pink florets. A prime favorite with florists who appreciate its fine tone quality and reliability.

King Alfred. He stands above other glads in the field so you cannot miss seeing his large orangy-pink florets. Has a cream throat, a distinctive coloring.

Lady Boo. Self color in shell pink — no markings. Up to ten medium size florets on medium tall stem.

Lady Jane. Creamy white with green shadings, a fine cut flower.

Mt. Index. Thousands of these are being grown for the early cut flower market. Tall, well placed white florets with a yellow throat. Eight open on good stem. It and Lindura are always the first to bloom with us.

Normandae. Medium to tall, strong grower with up to ten wide open florets. Creamy pink throat and deeper pink edges. Fine glad.

Oriental Pearl. A dual purpose glad, can be used as white in decorative work, its pearly florets blending beautifully. Very large wide open florets and it does a top-notch spike from even small bulbs. You cannot go wrong with a lot of this one.

Red Charm. Our favorite in the deep crimson class. Always gives a first class spike of large well opened florets.

R. B. Smokey. Hard to describe, a blending of brown, red orange and lavender.

Rollo. Reddish purple with lavender throat and smokey overtones. Our own breeding with R. B. as seed parent.

Spotlight. Deep yellow with red spot in throat.

Tahlahneka. Large self-colored medium yellow.

Tunolia. Novelty flower in purest white. Tulip shaped florets with a rather short flower head on a very tall stem. Fine for wedding baskets where clean white and long stems are needed.

Zelladee. Medium tall with long pointed florets and up to six open on slender stem. It is on the deep lavender rather than light side. Is very popular with flower arrangers, especially as a fine corsage flower. One of our own originations.

Group 2

Group No. 2 Prices

Large: 1—15c; 3—40c; 10—\$1.25. Medium: 2—20c; 5—45c; 25—\$2.00. Small: 5—35c; 25—\$1.25.

Connecticut Yankee—One of the perennial prize winners in the light pink class. Tall, many open.

Danny Danton. We originated this several years ago and have yet to find one in the ruby red class that is anywhere near as good. Large florets, six open on good stem, a clear ruby red with black velvet throat.

Dorothy Armstrong. Deep purple, six to eight medium to large open on wirey stem. One of the newer kinds.

Daisy May. Husky orange-salmon with reddish spot in throat.

Dragonette. Eastern fans have at last discovered this "Little One." Our own origination and it is an always winner as the smallest in the show. Florets resemble a snapdragon. Pink with yellow markings and sometimes the color scheme is reversed. Has individuality and charm.

Eunice Ewing. Outer half of florets is deep purple while inner part is snow white. No other glad of the same contrasting color and many growers consider it the best of our originations. Tall slender stems with six or more medium size florets open. Sometimes it crooks, which makes it exceptionally good for decorative work.

Golden State. Here is a yellow that really has a golden color. A good performer and a fine cutter.

Florence Nightengale. Many growers place this as tops in the large flowered class. It is tall, pure white, many open with some ruffling at edges.

Lindura. It is our own, but we back it as being the best and most reliable lavender of the lot. Somewhat formal in style, never crooks and is plain petaled. Real lavender with a deep plumb colored throat. Plant a hundred and cut a hundred saleable spikes. Tall grower, six to eight open and stands weather changes very well.

Lady Ann. We consider this one of the very best white glads. Tall, strong grower with six or more large, wide open milk white florets with some cream on the lower petals.

Mt. Gem. Deep scarlet, lighter than Red Charm. Good spike from even small bulbs. Our leading red for the cut flower trade. It is early with about six wide open.

Phantom Beauty. Lots of folks rate this the best of the blush pinks. Plenty open and a soft pleasing color.

Serene Susan. Our own white. Grows to 70 inches tall with up to ten eight-inch wide florets. Very faint yellow in throat, otherwise clear white. A little late for the shows therefore no prizes, but big demand from florists.

Spic and Span. A leading deep pink. A lot of florets open on a good stem makes it a prime favorite with florists and fans alike. Look at our price again—it's very low.

Sunspot. You can call it yellow or buff but either way it is a beautiful large flower on good stems. Has red sunspot in the throat.

Tunias Mahommet. Large florets on medium tall stems. Lots of folks think this purple-rose smokey is the best in its class.

Yankee Lass. Light pink with up to ten open at once with plenty more to come. Sister of Connecticut Yankee but lighter and without throat markings.

Group 3

Coy Connie. A Kaylor glad that wins prizes in the "Little Ones" class. Rather short stem with about six open and the most ruffles we have ever seen in a glad. Color is a medium pink, clean and sparkling. A fine table decorating flower. Try it with Dragonette. L. 1—25c; M. 1—20c; S. 1—15c. Five at four times single price.

A New Glad

Lalonie

Why should we introduce this new glad when so many new ones are being offered by hopeful breeders?

Well, we think it the best lavender yet. It is lavender, all lavender of that shade the ladies call "Orchid lavender." It is not a lavender-pink nor a lavender with a red throat, the lower petals are lighter to almost white. It is a tall grower with up to eight well placed florets open, is well supplied with buds and every spike is "gobbled up" by any florist in need of pure lavender flowers.

Lalonie is a Hawaiian name meaning "Beautiful Flower" and was given to a very popular song.

The only bulb of Lalonie ever permitted to leave our field was sent to Dr. Phillip G. Corliss, the Arizona man who supplies colored slides for garden clubs

all over the country. Dr. Corliss writes that he is so well pleased with Lalonie that he is including it in his advanced set of slides for rental this year. We might work up a big rave over this one, but we will let you do that after you have bloomed it in your garden. Number three, or larger, bulbs \$3.00.

Trees and Shrubs

Large, or specimen, sizes of all ornamental trees and shrubs are in short supply in every nursery in the country. We offer many out-of-the-ordinary plants in small sizes and suggest that you plant these. They are easily moved while small, recover from transplanting quickly and can be trained to suit your own ideas. The saving in cost over larger plants is enough to more than pay for the waiting while they grow.

We believe we have the most varied stock of any nursery in the Northwest. The list has been divided into two categories—Evergreen and Deciduous. All prices are at the nursery except those followed by the letters PP which are prepaid.

Evergreen Trees & Shrubs

Abelia Grandiflora

Flowers white with a pink blush, blooming over a long summer season on a glossy-leaved bushy shrub. 24-30 inch bushes, \$2.00.

Arborvitae — Globe

Dwarf evergreen much used in foundation planting where rapid growing bushes get out of bounds too fast. Keeps its globe shape with very little pruning. 10-12 in. \$1.00. P.P. 30 in. \$3.75.

Arborvitae - Pyramid

It is more of a column than a pyramid, reaching a height of 20 feet in old specimens. 24 in. \$2.00.

Box Barberry

Fine for low hedges or borders. Very compact, thorny, evergreen with small yellow flowers in spring. 6-8 in. \$1.00; P. P. 24-inch., \$2.50.

Barberry — Verticulosa

About the thorniest of all plants. Deep green foliage. Fine for individual plants or hedges. Dog proof. Large specimen plants \$2.50 to \$3.50.

Boxwood

Slow growing, small leaved evergreen. Fine if kept trimmed, in almost any shape desired. Fine for hedges—8-10 in. 75c P.P. 30-in. \$2.25—Quantity lots at lower price.

Boxwood

Varigated. Even slower growing than above variety. Has green leaves marked

with white flecking. Very dwarf. Plants at \$1.00 to \$3.50 depending upon age.

Cypress — Blue Canyon

Compact, tall growing blue-green tree. Flat leaves, hugging tight to trunk. Spire-like. 18-24 in. \$2.25, 36-40 in. \$4.00.

Cypress — Ellwood

Semi-dwarf tree. Narrow pyramid with soft, feathery, bluish-green foliage. Needs little pruning. 18-20 in. \$2.25.

Cypress — Fletcheri

Narrow pyramid, blue green color. Erect, soft, compact growth makes it fine for narrow yards. 12 in. \$1.00, P. P.

Cypress — Green Column

Same habit of growth as Blue Column. Dense vertical foliage. Narrow place plant. 30 in. \$2.00.

Cypress, Lawson's

We have a few very large specimens of this popular deep green evergreen at reduced prices at nursery.

Cypress — Wesseli

Compact, upright grower with branches twisted together to form round column of bluish green. 12 in. \$1.00 P. P.

Cotoneaster — Horizontal

Also called Rock Cotoneaster. Spreading to ten feet in old plants and bearing a winter crop of brilliant orange berries. 12 in. \$1.00 P. P.

Deodar Cedar

Light bluish green fountain-like tree that is called "The Tree of the Gods" in the Himalaya mountains where it originated. Small plants \$1.25 P. P.

Daphne Cneorium

Garland Flower, or Rose Daphne. Low growing shrubs famous for their sweet perfume. Our strain is almost a continuous producer of beautiful pink flowers resembling small roses. All our plants are of blooming size and range from 6-8 in. at \$1.00 P. P. to 24 in. specimens up to \$2.50 at nursery.

Juniper — Andora

Creeping evergreen with touches of bronze during the winter months. Low growing ground cover valuable for banks where other things find it tough going. 8-10 in. \$1.00 P. P. 15-18 in. \$1.50.

Juniper — Bar Harbor

Same spreading habit as Andora but a beautiful blue color the whole year through. 10 in. \$1.00 P. P.

Juniper — Chinese

One of the pyramids you will like. Color is blue-green and plant tapers from rather broad base to a slender spire. 8-10 in. \$1.00 P. P. 20 in. \$2.00.

Juniper — Colorado

We have these in both the green and the blue types. They are small, 6-8 in. at \$1.00 P. P.

Juniper — Irish

Rounded narrow column with many upright branches of finely cut greyish-green foliage. Grows to 15 feet. 30-36 in. \$2.50.

Juniper — Virginia

The Red Cedar of the middle west. When properly pruned it makes one of the best evergreen trees, 40-50 in. \$3.50.

Kalmia Latifolia

Commonly called Mt. Laurel and famous for its clusters of small teacup-like light pink flowers in June. Like the rhododendron it likes partial shade and will grow into a plant of about the same size. Blooming size 8-year-old bushes \$3.50.

Mugo Pine

Low growing, spreading type pine tree or shrub. 6-8 in. \$1.00 P. P.

Nandina Domestica

A chinese evergreen sometimes called "Heavenly Bamboo," although it is not root spreading. Grows into a beautiful plant with lacy tropical looking leaves that carry shades of bronze. Flowers are small, in large clusters and followed by berries. 6-8 in. plants \$1.00 P.P. 36-40 in. plants \$3.00.

Photinia — Chinese

Spreading shrub to six feet tall. Leaves resemble those of Holly except that tips of leaves and stems are a firey red. 24-36 in. \$3.00.

Pyracantha

Government Red. Spreading and climbing thorny shrub bearing brilliant red berries that last through the winter. Small plants \$2.15 P.P. Larger ones up to \$2.00.

Retinspora Aurea

Golden masses that may be pruned into almost any shape desired. 10 in. \$1.50 P. P. Larger sizes up to \$3.00.

Retinspora Veitchi

Same type as Aurea except it is a soft blue-tinted green. We have very large bushes only. Ask about prices.

Retinspora Squarrosa

Broad based pyramids. Bright green in growing season, takes on bronze coloring in the winter. Large bushes \$2.00 to \$3.00.

Teacrum — Germander

A border plant to 18 inches tall. Small green leaves with masses of small snapdragon-like creamy-lavender flowers through most of summer. Large bushes only. \$1.25.

Yew

Yews are slow-growing evergreens bearing heavy crops of red berries through the winter. We have two kinds, Hicks and Irish. 8-15 in. \$2.00.

Deciduous Trees and Shrubs

In this Northwest country where almost every landscape is beautified by evergreen trees, more attention should be paid to the planting of deciduous material. Deciduous trees provide the

shade of summer without shutting off the winter sunlight from our homes. In this class of shrubs is to be found most of the flower producers of summer. Plant more of them.

American Black Walnut

Slower growing than the Elms, otherwise as grand a tree of long life and great size. Ten to twenty ft.—\$4.00.

Buckeye — Horse Chestnut

Very attractive large leaves with pink flowers. Rapid grower providing a fine shade tree of medium height. Ten ft.—\$3.50.

Bridal Wreath Spiraea

Fine for either hedge or single bushes. Deciduous, spreading to six feet. Looks like a snow bank when it opens its thousands of rose-shaped white blossoms in June. 24- to 30-inch \$1.25.

Buddlea, Dubonnet

A new color in Butterfly bushes. Same strong grower as the other varieties but of the same color as the Dubonnet wine—a wine purple that becomes almost red under artificial light, \$1.00.

Buddlea, Charming

A pink shade. Flowers not quite so closely built as Dubonnet, 75c.

Catalpa

Slower growing but not so large as the Elms. Very large leaves and large clusters of creamy, cup-shaped flowers which are followed by long bean-like pods. 48-60 in.—\$3.50.

Chinese Elm

Faster growing than American Elm and does not reach such large size. A fine tree for dry land. Six to ten ft.—\$3.00.

Chinese Chestnut

Grows into a very large tree and produces good crops of nuts. Is immune to chestnut blight. 36 in.—\$3.00.

Dogwood

Cornus stolonifera. The eastern red barked shrub growing into a large bush and bearing many clusters of pinkish white flowers that are followed by purple berries. 48 in.—\$2.50.

Eastern Red Maple

Twigs are red and the fall coloring of red reminds one of the brilliance of eastern forests. Makes a fine shade tree. \$3.00 to \$4.00.

Flowering Crabapple

Malus Coronaria, garland or sweet crab. Large rose flowers, turning white and followed by small apples which make fine jelly. 30 in. \$1.50.

Forsythia

Profuse bloomer coming very early in the spring with its many golden flowers. Small plants \$1.00, P. P. Large bushes same price at nursery.

Ginkgo biloba

Attractive fern-like leaves and very

rough bark. Grows to a tall and very noticeable tree. 10-12 in. \$1.50 P. P.

Hydrangea

Grown on acid soil, this broad-leaved bush produces very large blue ball-like flowers. Sweeten the soil with lime and the flowers are pink. Sometimes freezes down but comes again from the roots. Division plants \$1.00 P. P. Large specimens \$2.00 to \$3.00.

Kentucky Coffee Tree

Big fellow, needs lots of space, but one of the best for spacious grounds. Large leaves, white flowers at ends of twigs. Big flat pods in clusters and they hang on nearly all winter. 10-12 in. \$1.00 P. P.

Kolwitzia, Beautybush

Grows into an eight-foot specimen and produces many small snapdragon-like cream-pink flowers in June. Large bushes \$2.00.

Lavender

Genuine Old English fragrant kind. \$1.00 P. P.

Philadelphus Coronarius

European Mockorange. Grows into a large shrub and produces many creamy-white flowers early in summer. One of the most fragrant of all shrubs. Two to three foot, \$1.25.

Red Bud — Judas Tree

Small tree or large shrub depending on pruning. Big round or heart-shaped leaves. Great clusters of red flowers on the twigs before the leaves develop in early spring. 30 in. \$1.25 P. P.

Rose Accacia

Shrub to ten feet. Belongs to the pea family and produces many rose colored flowers in early summer. 24 in. \$1.25 P. P.

Sugar Maple

The famous Sugar Tree. Not a rapid grower but reaches great height. Has a clean look and its large leaves take on brown and red shades in the fall. Three to five foot trees \$2.50.

Sycamore

Also called the American Plane Tree. One of the cleanest-limbed of all trees. Very large leaves and ball-like seed pods on long slender stems. Grows rapidly into a tall round-headed tree. 10-12 in. \$1.00 P. P.

Sweet Gum

Rather slow growing but well shaped even when small. Leaves resemble cut leaved maple and remain green well into th winter. Reaches 50 ft. in old specimens. 30 in \$2.00..

Sweet Shrub

Very fragrant chocolate colored flowers on medium sized spreading shrub. 10 in. \$1.25 P. P.

Tulip Tree

Grows to be very large and has bell-shaped Magnolia-like yellow flowers very early in the spring. These are followed by long cone-shaped fruits. 36-60 in. \$2.50.

White Fringe Tree

Grows to 25 feet tall. Fluffy clusters of white flowers at ends of twigs gives it its lacy look and name. Blue fruit follows blossom period. 10 in. \$1.25 P. P.

Weigela

Tall growing shrub of spreading habit with cup-shaped flowers in great abundance in early summer. Flowers are rose pink hanging in sprays from the branches. Large bushes, \$1.25.

Azaleas

We have quite a number of Azaleas not listed in this catalog. Stocks are too small, but we will be glad to hear from customers who want varieties not listed.

Among the newer kinds the Glen Dale hybrids take first place with us. These were developed by the U. S. Dept. of Agriculture and introduced about four years ago. We have small stocks of a dozen varieties and will be glad to have folks drop in and see them this season. They are hardy and have larger flowers than most other kinds. Below we list two varieties. Both are evergreen.

Aphrodite. Glen Dale. Rose pink, throat sprinkled brown, mid-season. We have bloomed this one and it is fine. Dwarf, bushy plant. \$2.50.

Buccaneer. Glen Dale. Mid-season red, and what a red! Brownish spots in throat. Large bush for a dwarf sort. \$2.50. Other kinds are listed following:

Amoena Coccinea. Low growing evergreen with very dark green leaves and small but brilliant red flowers so thick as to cover bush. Large plants \$2.25.

Coral Bells. Compact, spreading evergreen bush with coral pink flowers. Very popular with gardeners. 10-12 in. \$1.50 P. P.

Maxwell. Large for semi-dwarf. Large leaves and flowers. Color is deep red. Large plants, \$2.25.

Mollis. The early blooming, large flowered deciduous azalea so popular with gardeners. Shades of red and orange. 12 in. \$1.50; 30 in. \$2.25.

Poukhanense. Deciduous, early blooming, even before the leaves get started. Lavender in color. 8-10 in. \$1.25 P. P. Larger plants \$2.50.

Sherwood Orchid. A new kind from Oregon. A hybrid of hinodegiri. Evergreen, semi-dwarf with heavy crops of lavender flowers. Throats sprinkled deeper color. 10-12 in. \$1.75 P. P.

Sherwood Red. Similar to Sherwood Orchid except for a fine rose red color. 10-12 in. \$1.75 P. P.

Snow. Semi-dwarf with plenty of snow white flowers. Evergreen.—10-12 in. \$1.75 P. P.

Heathers

Winter and early spring blooming shrubs that add so much beauty to the border or in the rock garden. Our plants are strong, well rooted and of large blooming size. Lower priced on cash and carry.

Mrs. H. E. Beal

Soft pink double flowers on long spikes. A fine cutting kind. \$1.00 P.P.

Mediterranean, or Winter Heath

Compact bushes up to fifteen inches tall with great masses of lavender sprays from Christmas on, \$1.00. P. P.

Erica Carnea

Similar in habit to Mediterranean but with red flowers. \$1.00. P. P.

Erica Carnea Sherwoodi

Not so tall growing as other kinds, but of spreading habit with deep rose flowers. \$1.00. P. P.

Colluna Aurea - Golden Heather

Foliage is greenish yellow and flowers are lavender. It blooms somewhat earlier than other kinds listed. \$1.00. P. P.

Peonies

May be planted in the spring if the work is done very early. Do not let them bloom the first year after planting and be sure to select a spot where they can remain undisturbed for several years. If order is received too late for spring planting we will carry it over until September and send the roots at that time.

Cherry Hill. Semi-double garnet red on tall stems. Mid-season. 75c.

Felix Crousse. Large, loosely - built crowns on tall stems in a dark pink or medium red. Early. 75c.

Festiva Maxima. Very large semi-double white with red center. 75c.

Eugene Bigot. Deep red of good size and blooming quite late, it extends the season of Peony bloom. 75c.

Mons. Jules Elie. Early globular-crown type, and perhaps the most popular of pink sorts. 80c.

Officinalis Rubra Plena. The big deep red that is always welcome because it is the first to bloom, 75c.

Philomela. Called the yellow peony. Semi-double, large white flowers with a yellow center. A beautiful novelty. \$1.00.

Venus. Medium tall, double flower in light pink. 75c.

FORCE'S MOLE KILLER

Tablet form of poison that moles will eat. We have used this for years, have sold many cans, and have found it good. Full directions with every can and it is sold with a money-back guarantee. Two and one-half ounce can 50c; seven-ounce can \$1.00.

Dahlias

You can plant every one of these Dahlias with the assurance that each has something to distinguish it from the others. You will not find a lot of near duplicates, the closest being Jane Cowl, Oriental Glory and Tower's Empire, and these similar only in color. Give your Dahlia patch individuality this summer.

Every one of these produced fine flowers last summer. They were not irrigated and the tubers have that hardy strength for good production next season. Stock of some varieties is limited so we would like substitute list, if possible.

Amber Queen. A very heavy producer of two-toned amber-apricot pom poms on tall bushy plant. 35c.

Bellego's Glory. Eight inch formal decorative in deep mahogany color with tips of petals gold. 60c.

Berger's Masterpiece. Large cactus type, pink with brownish tints toward center. 50c.

Bobby. Small balls of rich Italian prune purple. 35c.

Champoege. Its only drawback is its slowness in increasing. That should not bother the garden fan. Perhaps the most noticed of all our Dahlias by the garden fans. Waxy yellow with considerable pink at tips of petals. 75c.

Commodore. Informal, sturdy bush and it needs it to support the extra large golden yellow blossoms. 35c.

Deep Velvet. Very large formal flower in deep carmine with lighter red overlay. Velvety texture. \$1.00.

Dreamthrope. Miniature in size, light terracotta and orange. Medium tall bush plant. 50c.

Eunice. Small balls of lavender with cream base. 35c.

Eleanor Francis. Informal 10 - inch flowers in bright red. 60c.

Hill's Supreme. Very tall plant with large deep rose pink flowers on good stems. Deeper than Jersey Beauty. 50c.

Ida Perkins. An old one but still one of the best formal whites. 40c.

I. K. E. About the tallest of them all with long stiff stems and medium sized ruby red flowers. 50c.

Jane Cowl. Still going to town in winning prizes after all these years and still one of the best producers of large golden-orange flowers. 40c.

Jersey Beauty. The tall pink by which other pinks are judged. It's a standard. 50c.

Joe Fette. Small balls of pure white. Low plant. 35c.

Marjorie Emberson. Its real pink miniature blossoms are always favorites with flower arrangers. 50c.

Miss Glory. Large lemon yellow informal cactus flowers. 60c.

Oriental Glory. Orange scarlet — very large. 60c.

Satan. Firey red semi-cactus. Temperamental, sometimes shades lighter. 40c.

Thomas A. Edison. A very formal, full centered flower in a deep purple color. 60c.

Tommy Keith. Deep red tipped white. Sometimes the color scheme is reversed on the same plant. Pompom. 60c.

Tower's Empire. A very tall plant with immense flowers in gold with some amber shadings. Finely cut foliage. 40c.

Winnifred. Our candidate as best red pompom. 35c.

White Cactus. We believe this is a sport of Jersey Dainty. It is white, semi-cactus in style, and a fine performer. 40c.

Perennials

All our perennial plants are produced by divisions and cuttings taken from known mother plants. Years of work must be devoted to this work before a salable quantity of plants can be offered the gardening public. Such plants cost more than the ordinary kind—and they are worth it in added pleasure. If you want just ordinary plants buy a batch of seed and in a couple of years you may have a few that are worthwhile.

Our perennials are grown on high bench sandy loam land without special fertilizing and without irrigation. Strong, well rooted, quick starting, insect resisting plants are the result.

Perennials are postpaid.

Anemone, Queen Charlotte. Semi-double light pink of large size. Both this and whirlwind grow to 30 inches tall and bloom over a long summer and fall season. 35c.

Anemone, Whirlwind. About same as Queen Charlotte except pure white in color. 35c.

Columbine, Kaylor's Blue Beauty. A true perennial of our own development. Large bushy plants bearing hundreds of long-spurred lavender-blue flowers with snow-white cups. The largest Columbine we have ever seen and the most prolific bloomer. Large plants, 50c; divisions, 35c.

Columbine, Kaylor's Sunset. The same strong growing habit as Blue Beauty, but a strikingly contrasting golden throat and red outer bell. Not quite so dense a bush, but of equal height. Plants 50c, divisions 35c.

Delphiniums. We have a fine lot of these, grown from seed selected from a choice lot of Pacific Hybrid plants. These are strong one-year-old and should bloom this year, but must be ordered and planted early. Three for 50c; ten for \$1.10.

Dicentra. The well-known old time Bleeding Heart that produces those long

nodding stems of bright red, heart shaped flowers so early in the season. Plants 65c. Order early.

Gypsophila, Bristol Fairy. The double Baby's Breath. Large roots, \$1.25.

Gypsophila, Colorado. Not so tall as Bristol Fairy but much denser with double white flowers. Large roots, \$1.00.

Helleborus Niger — Christmas Rose. Low growing evergreen plants with anemone-like flowers up to three inches across blooming around Christmas time and on into the spring. Glistening white with greenish tone at center. Likes shade. Ours bloom in full sun. Blooming size plants \$1.00, three for \$2.65.

Incarvillea, Hardy Gloxinia. A most beautiful and interesting perennial. Gloxinia-like trumpets in rosy-purple start opening low on the ground and the stems grow so rapidly that by the time they are fully open they are more than two feet tall. Heavy roots resembling salsify. Must be moved by April 15. 65c.

Phlox, Gefion. Medium tall, large red and white, 35c.

Phlox, Miss Lingard. Tall, strong grower making a large plant with hundreds of large white flowers, 40c.

Phlox, Rising Sun. Deep Salmon or medium red. Large and tall, 40c.

Phlox, Fuerbrand. Firebrand. Good name for this large fiery red, 40c.

Phlox, Rosalinda. Soft pink. Lots of flowers on tall stems over a long season, 35c.

Phlox Sublata

Creeping, moss-like foliage which, during blooming season, is hidden by masses of flowers. Fine for rock walls or for carpeting ground. It is evergreen.

Fireking. A fine red colored sort, 35c.

Rosea. Medium pink color, 35c.

Alba. White. A snow bank when in bloom, 35c.

Stokesia, Stoke's Aster. Blue Moon. Very large light blue flowers with a touch of lavender, on foot stems. Stokesias bloom over a long season until frost. 35c.

Stokesia Cyanea. Our own development of this beautiful sort. Deeper blue than Blue Moon, 35c.

Thalictrum. Pyramedial clusters of lavender and gold flowers on tall stems. Both flowers and foliage fine for bouquet fillers. Large plants, 40c.

Trollius, Globe Flower. Lots of gardeners are overlooking a fine thing here. Grows to two feet, produces yellow to golden-orange globe shaped flowers over a long season. This is one of our own developments and very fine. 40c.

Clematis. Henry. This is the large flowered white that does so well as a trellis flower. Profuse bloomer but does not like to be moved around. \$1.00.

Viola. Chief Seattle. A Kaylor origination that does especially fine on Puget Sound but is not recommended for hot climates. Almost any month of the year you can find the large, deep reddish-purple flowers on this plant. Makes a fine border. 50c.

Viola, Monger's Favorite. Right up beside Chief Seattle for quality and productivity but of a decided blue color. 50c.

Watch your violas that strawberry root weavel do not eat them up. Spray with Carco-X.

Shasta Daisies

After the Painted Daisies finish their main blooming, these take their place and usually last until frost. They are lower growing, shorter stems, but in the case of Esther Reed have the same fully double flowers all summer long. Esther Reed plants 35c. Strong divisions, to bloom late the first year, 5 for \$1.00.

Chiffon. Double flowers, not so full as Esther Reed, with lacinated edges and some yellow in center. 40c.

G. Marconi. Very large ragged edged white flowers. Best to stake it — has strong stems but they cannot support extra large flowers. 40c.

Hardy Chrysanthemums

These have proven hardy out in our fields over winter. They are good varieties for either landscape effect or as cut flowers. Our plants are root divisions and will bloom next fall.

Autumn Sunlight. Early, pure golden-yellow. Medium tall. 35c.

Capt. John Smith, 24-inch. Medium to large size. Fine cut flower pink, 35c.

Early Bronze. E. Medium tall, bushy plant. Heavy producer of golden-bronze pompoms, 35c.

Early Wonder. Tall, large pink pom-pom with lavender tones. Not so early here as back east, 35c.

Harbinger. An early golden-bronze about two feet tall. 35c.

Jasper Spoon. Late. Straw-yellow tubes, jasper-red spoons, 35c.

Sequoia. Blending of red, yellow and bronze into what might be called apricot. A late bloomer but large and beautiful. 35c.

Yellow Spoon. Both tubes and spoons light yellow on 24-inch stems, 35c.

Zantha. Ball-shaped flowers in canary-yellow on 22-inch stems. Fine addition to any garden, 35c.

Add 25c postage if your order is for less than \$1.25.

We guarantee our stock to be as represented, but as many elements beyond our control enter into the production of crops, our responsibility ends when we have delivered shipments to transportation companies. If you are not satisfied when you receive the goods, send them back and get your money.

Visit Our Nursery

Always glad to have folks drop in and give us a chance to show them around. Nearly always something in bloom, especially during the glad season. The map shows how to reach us—pavement to within half a mile of the nursery.

Got a Bug?

Any kind of a bug eating up your garden? Are onion, cabbage and carrot maggots living fat on your vegetables? Leaf hoppers and flea beetles ruining your spuds? Aphis and thrips making your glads, roses and other flowers look sick? Wire worms, root weevil and nematodes hiding underground and cutting off the roots of plants?

Want to put up a winning battle against them? Then give CARCO-X a trial. It's been on the market long enough to prove its worth in clearing up the Pests. It is water soluble and a quart will make from 25 to 50 gallons of spray material. It is a good fungicide. Full directions with every bottle and be sure to follow them. NON-POISONOUS.

Prices postpaid: $\frac{1}{2}$ pt. \$1.20; pint, \$1.75; quart, \$2.85; gallon, \$6.45. Plus state sales tax. Fifteen per cent less at nursery.
